The two previous primary segments Direct and Securitas Systems are treated as discontinued operations according to IFRS 5. Further information is provided under the heading Accounting Principles on page 15 and in Note 11 on pages 22–23.

The Group has adopted the amendment to IAS 19 Employee Benefits as of January 1, 2006. The change in accounting principle means that actuarial gains and losses are now recognized immediately via equity. Comparatives have been restated for 2004 and 2005. Further information is provided under the heading Accounting Principles on pages 15–16 and in Note 4 on page 21.

The Group has separately disclosed items affecting comparability on the face of the Statement of income and on the face of the Operating cash flow statement. Comparatives have been adjusted to reflect this change. In previous quarters such items were included in Operating income before amortization. Further information is provided under the heading Comments to items affecting comparability on pages 4–6.

The aggregate amount classified as items affecting comparability for Security Services amounts to MSEK -333 for the fourth quarter and for the full year 2006.

Esabe

In January 1992, Securitas acquired Esabe, Spain's then second largest company in the guard services and cash-in-transit segments. Shortly following such acquisition, the seller in such transaction filed for bankruptcy under Spanish law. As a consequence of such bankruptcy filing, Securitas has been involved in multiple litigations with the bankruptcy estate in respect of claims by the estate relating to the validity of the acquisition transaction and certain accounts claimed to be due to the estate. During 2006, final rulings in these litigations were made by the Spanish Supreme Court. Following these final rulings, Securitas entered into settlement negotiations with representatives of the estate and a final settlement has been agreed to with the estate resolving all of the outstanding claims. A provision has been recognized in the amount of the payment to be made to the estate under the settlement agreement.

Globe/Federal Aviation Administration

Prior to the Aviation and Transportation Security Act (Aviation Security Act), which was passed in November 2001, the air carriers were responsible under federal law for providing pre-board screening of passengers. In most cases, the air carriers contracted with private security companies for these services. Under the Aviation Security Act, pre-board screening services were federalized in two steps. The first step consisted of a transition period where the Federal Aviation Administration (FAA) became the party responsible for pre-board screening and contracted with private security companies for these services (the FAA's responsibilities were later transitioned to the Transportation Security Administration (TSA)). The second step, which occurred in November 2002, consisted of the TSA directly providing these services by federal government employees. Globe had been requested to provide pre-board screening services during the initial transition period and, following extended negotiations, Globe entered into an agreement with the FAA in February 2002 to provide such services during the transition period. Based on the performance of Globe during this transition period, in April 2002 Globe contracted with the FAA/TSA to service additional airports. During the transition period, the FAA/TSA compensated Globe based on the governing contract and the invoices submitted.

After the services had been substantially completed, the TSA indicated that it wished to renegotiate the pricing under the contract and stopped making payments under the contract. Following unsuccessful negotiations attempting to resolve the amounts in dispute, Globe commenced during 2004 formal legal proceedings to recover the amounts due under the contract.

The trial in this matter is currently scheduled for February 2007. Management has determined that an additional bad debt provision should be recognized in the amount of the net account receivable which remains uncollected.

Brazil

In connection with the efforts of Securitas to expand its activities in South America, during 2005 Securitas entered into an agreement with respect to the possible acquisition of a security guard company in Brazil. In order to support this company while required governmental approvals were obtained, Securitas provided a bank guarantee for the benefit of the subject company. The governmental approvals took much longer than anticipated to obtain and during such period the financial condition of the target company substantially deteriorated. Given the decline in the financial condition of the company, in December 2006 Securitas exercised its right not to complete the acquisition following the receipt of the government approval. The government approval confirms the ability of foreign companies such as Securitas to enter the Brazilian security market. In view of the decision not to complete the subject transaction, a provision in the amount of the bank guarantee and for other expenses incurred has been recognized based on management's best estimate as of December 31, 2006.

Premises in Germany

After the divestiture of the German cash handling operations and also as a result of the subsequent bankruptcy of the Heros Group of companies, Securitas has certain exposures in relation to properties in Germany. The Group has provided for onerous rent contracts and has also tested buildings for impairment. As a result provisions for onerous rent contracts and impairment losses have been recognized. The provisions and impairment losses have been allocated between Security Services and Cash Handling Services based on the previous utilization of these properties.

Cash Handling Services related items

The aggregate amount classified as items affecting comparability for Cash Handling Services amounts to MSEK -1,138 for the fourth quarter and MSEK -1,511 for the full year 2006.

Welo

During 2001 Securitas in Germany in response to customer requests took on cash booking responsibilities (referred to as Welo – Werte logistik) in addition to the cash in transit activities which it had historically provided in Germany. In connection with the performance of these Welo activities during the time of the euro introduction in Germany, a loss developed with a major customer. The amount of the loss was advanced by Securitas Germany to the customer in accordance with the relevant contract in two payments (one paid in 2003 and the other paid during 2004) and the equivalent has been claimed against the relevant insurance policies.

The German cash handling operations were divested in November 2005 to the German Heros Group, however the economic interest in the Welo claim was retained by Securitas as part of that transaction. The company holding the legal Welo claim was sold to Heros in this transaction. In February 2006 the Heros Group of companies filed for insolvency under German law, including the company which is the nominal plaintiff in the Welo claim. Against this background Securitas decided during the second quarter 2006, to provide for the full Welo claim. The insurance claim will continue to be pursued as planned.

Heros

The German Cash Handling operations were divested in November 2005 to the German Heros Group. In February 2006 the Heros Group of companies filed for insolvency under German law. In connection with the foregoing, the insolvency trustee is examining all relevant prior transactions of the insolvent companies, including the German cash handling companies which Securitas sold to the Heros Group. Management has determined that a provision should be recognized in respect of the Heros insolvency.

As mentioned above, under Security Services, Securitas also has certain exposures in relation to properties in Germany. The Group has provided for onerous rent contracts and has also tested buildings for impairment. As a result provisions for onerous rent contracts and impairment losses have been recognized. The provisions and impairment losses have been allocated between Security Services and Cash Handling Services based on the previous utilization of these properties.

Securitas Cash Management Ltd (SCM)

A detailed account of the developments in SCM has been presented in Securitas interim reports since the third quarter 2005, in Securitas annual report 2005 and onward.

SCM is a company jointly owned by Loomis (75 percent) and HSBC and Barclays (12.5 percent respectively). SCM was created when the two banks in 2001 decided to outsource their handling of physical cash (notes and coins) in UK. SCM took over 28 cash centres spread over the UK from the two banks and Loomis. SCM also took over all employees and the existing work procedures and reconciliation methodology.

During 2002 - 2004 the 28 cash centres were reduced to 11, new work streams and methods were developed and implemented and the efficiency of the operations were improved. One of the important enhancements was the introduction of an IT-system, designed to replace the predominantly manual based systems, to keep fully automated track of all cash received, processed, stored and distributed by the cash centre operations.

As a result of these actions, SCM performs a high quality service to the banks and achieves a good operating profit.

When cash is received by the centres and cash is distributed out from the centres, corresponding entries are registered on bank accounts relating to SCM, the banks and the clients of the banks. Certain of these procedures were manual at the time SCM took over the outsourcing contract, and some still are manual today. There are approximately 10 million transactions through all the cash centres each year. Depending of the type of transaction entries are made either by local bank branches, centralised bank

functions and/or by SCM. A new process, jointly developed by the banks and SCM, to fully automate these entries and reconcile all entries so as to reduce and then eliminate the possibility for mistakes, is under implementation.

Over the last two years, a fully automated reconciliation system has been developed and is in the course of being implemented across all cash centres in order to identify and correct manual booking errors. This provides a robust system for timely reconciliation of entries and investigation of any errors made by either the banks or SCM. The continuous development of IT systems will provide management with information so as to address errors or problems in a timely manner.

Following the consolidation of cash centres and the establishment of new work procedures were introduced, variances between the bank accounts and the automated system in SCM were identified. In April 2005 a dedicated team to investigate the variances was established by SCM. The investigation was complicated by the difficulty to obtain electronically based information from the banks and the large volume of manual records. Independent outside consultants were engaged in October 2005 to assist in the establishment of improved IT and management systems and to assist in the investigation of the variances.

As a result of the continuing investigation by SCM and the external independent investigators into the variances, the amount of the variance has been estimated to be MGBP 61 as of December 31, 2006. A provision equal to the estimated variance has now been deemed justified.

Management has taken steps to strengthen the control systems in place as well as strengthening the management team for Loomis and SCM. The investigation into the variance is continuing and SCM is working closely with the banks to address the causes of the problem. It is not possible, until the results of the investigation are known, to evaluate in a meaningful way the rights and obligations of SCM in respect of third parties or the ability of SCM to claim any part of the variance through insurance.

According to the Swedish listing agreement, Securitas has informed the Stockholm Stock Exchange about the SCM situation and in accordance with normal procedures, the Stock Exchange will initiate a review.

Group (Other) related items

Costs relating to the listing project and the relocation of the Securitas head office to Stockholm have been treated as items affecting comparability. These costs amount to MSEK 32 for the fourth quarter and to MSEK 216 for the full year 2006.

Divestiture of German cash handling operations in 2005

The capital loss of MSEK 151 has been treated as an item affecting comparability in the comparatives in the fourth quarter and for the full year 2005.

The trend from previous quarters in 2006 with positive development in both organic sales growth and operating margin continues. Key indicators such as new sales and contract portfolio show development ahead of last year. The division show both organizational and operational stability. During 2006 continued measures have successfully been implemented to increase efficiency in operations and transparency in the service delivery.

In the beginning of August, 2006 the North American operation retained and expanded the contract with General Motors in the USA and Europe. The contract has a total value of approximately MUSD 800 over five years and is effective as of January 1, 2007.

October – December 2006

The organic sales growth was 3 percent in the fourth quarter. The lower organic sales growth rate compared to the fourth quarter 2005 is explained by last year's increased activities following the hurricanes in the USA, which had a positive effect on organic sales growth of 4 percentage points in the fourth quarter 2005.

The operating margin was 5.3 percent. The decrease in operating margin is explained by the hurricanes during 2005. The hurricane activities impacted the operating margin positively in the fourth quarter 2005 with 0.4 percentage points.

January – December 2006

The organic sales growth was 5 percent. Adjusted for the increased activities following the hurricanes both in the third and fourth quarter 2005 and first quarter 2006, the organic sales growth rate was 6 percent.

The operating margin was 5.0 percent which is flat compared to 2005. Adjusted for the hurricanes during the second half 2005, the operating margin shows an increase of 0.2 percentage points.

Sales of new contracts were strong with a volume increase of 13 percent compared to 2005. The contract portfolio grew by 5 percent on an annualized basis. Prices and wages increased by 2 percent and the client retention rate remained stable over 90 percent. The employee turnover was 70 percent, which is mainly due to an overall stronger U.S. labour market.

In Security Services Europe a new organization was implemented during 2005. In 2006 Mobile services and Alert services were established as separate operations. The European guarding operation as of January 2007 consists of Security Services Europe, specialized guarding for large customers including Aviation security; Mobile services for small and medium sized customers and Alert services for electronic surveillance of homes and businesses.

In July 2006, Securitas in Sweden received a contract with the Swedish Aviation Authority (Luftfartsverket) to provide security solutions and technology support to both Arlanda and Bromma airports in Stockholm. The total value of the contract is approximately MSEK 1,000 over five years effective as of February 1, 2007.

October – December 2006

The organic sales growth was 7 percent in the fourth quarter, driven by the growth in the contract portfolio. Aviation security is showing double digit organic sales growth. Mobile services show improvement in organic sales growth for the third consecutive quarter, but is still under the divisional average.

The operating margin was 7.8 percent. The operating income is impacted by one-off social security payments relating to inspections of previous years' tax returns and bad debt provisions in relation to the loss of a major customer of MSEK -42. The airport security business has stabilized with strong organic sales growth and contributed to the improvement in operating income for the division during the fourth quarter.

January – December 2006

The organic sales growth was 7 percent. The increase in organic sales growth is mainly due to the large customer operations including Aviation security and some minor effects coming from the FIFA World Championships in Germany.

The operating margin was 7.1 percent which is 0.4 percentage points lower than for 2005. The operating income was negatively impacted by the airport security business with MSEK 60, one-off social security payments relating to inspections of previous years' tax returns and bad debt provisions in relation to the loss of a major customer of MSEK -42.

The contract portfolio grew by 5 percent on an annualized basis. Prices and wages increased 1.5 percent on an annual basis. The client retention rate was above 90 percent on an annual basis. The employee turnover was 35 percent.

Cash Handling Services provides transportation of cash, maintenance of cash machines and cash management. The aim is to increase the proportion of maintenance and cash management and this proportion is now up to 34 percent of total sales in the division. Late 2006 the division started its name change and rebranding to Loomis which will be the joint brand name for all operations in Europe and in the USA.

Håkan Ericson started as new CEO of Loomis in September 2006 and the division is now focusing on daily business and listing preparations. The listing is planned to take place during the second half 2007. Cal Murri, former regional President in the Western Region in the USA, was appointed President for all U.S. operations as of October 2006. Loomis is by the end of 2006 a separate legal entity within the Securitas Group.

After a proposal from the nomination committee of Securitas AB, the Board of Securitas AB has appointed Jacob Palmstierna to be the new chairman of the separate Loomis Board. October – December 2006

The organic sales growth was 4 percent, which is 3 percentage points higher than in the fourth quarter 2005. The improvement is mainly due to strong development in central Europe, Iberia and USA.

The operating margin was 8.4 percent, which is 0.1 percentage point higher than last year. The operating income in the fourth quarter was still burdened by continued difficulties to cover increased fuel costs and wage increases in the USA, and start up costs for new contracts. Sweden shows good improvement in operating margin due to increased internal efficiency following the robberies and attacks in 2005 and 2006.

January – December 2006

The organic sales growth was 5 percent supported by the strong growth in the U.S. and Iberian operations.

The operating margin was 7.3 percent, which is 0.1 percentage point higher than last year, including the operating loss of MSEK 58 in the German operation, divested in the fourth quarter 2005.

The operating income in 2006 was still burdened due to difficulties to cover increased fuel costs and wage increases in the USA, but also start-up costs for a new contract in Denmark that has continued throughout 2006.

Strong development was recognized in France with higher organic sales growth and margins above divisional average.

ACCOUNTING PRINCIPLES

In general

Securitas' consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IAS/IFRS as endorsed by the European Union) issued by the International Accounting Standards Board and interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC).

This full year report has been prepared in accordance with IAS 34 Interim Financial Reporting and RR 31, Consolidated Interim Financial Reporting. The most important accounting principles under IFRS, which is the basis for the preparation of this full year report can be found in Note 1 on pages 80 to 83 in the published Annual Report for 2005. The accounting principles are also available on the Group's website www.securitas.com under the section Financial Information -- Accounting Principles.

IFRS 5 Non-current Assets Held for Sale and Discontinued Operations

The Group applies IFRS 5 Non-current Assets Held for Sale and Discontinued Operations, which sets out requirements for the classification, measurement and presentation of non-current assets held for sale and discontinued operations.

A discontinued operation is a component of an entity (Group) that represents a major line of business or geographical area of operations. According to IFRS 5 a non-current asset (or disposal group) classified as held for sale shall be measured at the lower of its carrying amount and fair value less cost to sell, if the carrying amount will be recovered through a sales transaction rather than through continuous use in the operations. Assets held for sale are not subject to depreciation or amortization from the date of recognition as assets held for sale up until the disposal has been completed. The net income (after tax) generated by assets held for sale and discontinued operations are included on a separate line, Net income for the period, discontinued operations.

The Extraordinary General Meeting in Securitas AB held on September 25, 2006, resolved in accordance with the Board of Directors' proposal, on a dividend to the effect that all shares in the wholly-owned subsidiaries Securitas Direct AB (Direct) and Securitas Systems AB (Securitas Systems) would be distributed to the shareholders. The dividend date was September 29, 2006 and from that date Direct and Securitas Systems are no longer part of the Securitas Group. These operations, which in the Securitas Group previously comprised the two primary segments Direct and Securitas Systems, consequently qualify as discontinued operations according to IFRS 5 and are treated according to this standard.

Further information on the application of IFRS 5 is provided in Note 11 on pages 22–23.

Adoption and impacts of new and revised IFRS for 2006

The Group has adopted the amendment to IAS 19 Employee Benefits as of January 1, 2006.

This amendment has from January 1, 2006 changed the Group's principle for recognizing gains and losses resulting from changes in actuarial assumptions, plan experience and developments of the investment performance differing from that assumed. According to the principles that were in force for 2004 and 2005, these had been spread evenly in the statement of income over the future working lives for the

employees covered by the plan to the extent that accumulated gains and losses on the balance sheet date fell outside the so called corridor at the beginning of the period. The changed accounting principle means that these gains and losses now are recognized immediately via equity. Comparatives for 2004 and 2005 have been restated accordingly.

Further information is provided in Note 4 on page 21.

We have reviewed the interim report for Securitas AB (publ.) for the period ended December 31, 2006. Management is responsible for the preparation and presentation of this interim financial information in accordance with IAS 34 and the Annual Accounts Act. Our responsibility is to express a conclusion on this interim financial information based on our review.

We conducted our review in accordance with the Standard on Review Engagements SÖG 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by FAR. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing in Sweden RS and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not, in all material respects, in accordance with IAS 34 and the Annual Accounts Act.

Note 11 Discontinued operations

Discontinued operations are defined as the two previous primary segments Direct and Securitas Systems (Systems) as they were presented in the Securitas Group. The previous primary segments Direct and Systems as included in the Securitas Group will differ from the listed companies Securitas Direct AB and Securitas Systems AB. The primary segments have been accounted for under IAS 14 Reporting for Segments. Reporting for segments differs from a reporting on a stand alone basis in that:

- Segment reporting is limited to operating income and excluding certain intra-group transactions that are not of an operating nature.
- Segment reporting as a consequence excludes financial items and tax.
- When adjustments have been made to the consolidated financial statements of the Securitas Group, these adjustments are based on historical segment data already published and in addition to this, adjustments for finance net and tax attributable to the segments. These items were previously recognized under the heading Other.
- The Total Sales has been adjusted for intra-group sales to and from Direct and Systems. This adjustment impacts the intra-group sales previously recognized in Direct and Systems, but also in the continuing operations as well as the elimination of intra-group sales included under the heading Eliminations.
- The Operating income before and after amortization has been adjusted for intra-group margin relating to combination contracts between Security Services Europe and Systems. This intra-group margin was previously included under the heading Eliminations.

In summary the restatement according to IFRS 5 has been applied as follows:

- The income statement for the Securitas Group includes the net income in Direct and Systems up until September 29, 2006.
- The net income in Direct and Systems up until September 29, 2006 is included on the line Net income, discontinued operations in the Consolidated Statement of Income. This means that the impact from Direct and Systems on each line in the Consolidated Statement of Income has been adjusted and is recognized as a net total on the line Net income, discontinued operations. A specification of the Net income in discontinued operations is given below on page 23.
- This adjustment has also been carried out for all comparatives in the Consolidated Statement of Income.
- The cash flow impact from Direct and Systems up until September 29, 2006, is included on the line Cash flow for the period, discontinued operations in the Consolidated Statement of Operating Cash Flow. This means that the impact from Direct and Systems on each line in the Consolidated Statement of Operating Cash Flow has been adjusted and is recognized as a net total on the line Cash flow for the period, discontinued operations. The condensed Consolidated Statement of Cash Flow according to IAS 12 is however not restated and the impact from discontinued operations is shown line by line for Cash flow from operations, discontinued operations, Cash flow from investing activities, discontinued operations and Cash flow from financing activities, discontinued operations.
- This adjustment has also been carried out for all comparatives in the Consolidated Statement of Operating Cash Flow and the condensed Consolidated Statement of Cash Flow according to IAS 12.
- The impact on the closing net debt from the dividend is shown on page 18 in Change in net debt on the line Impact from dividend of discontinued operations.
- The balance sheet as of September 30, 2006 excludes all balances related to Direct and Systems.
- Non-segment balances such as current and deferred taxes, accrued interest, net debt and shareholders' equity, previously included under the heading Other are also excluded since they are legally balances belonging to the new companies.
- In accordance with IFRS 5, the comparatives for the balance sheet are not adjusted. However the table for Capital employed and financing on page 18 and the Divisional overview on page 20 separates the segment assets in discontinued operations also for comparatives. The net assets (operating capital employed and capital employed) previously included under the segments Direct and Systems are shown as Capital employed, discontinued operations.

Note 11 (cont.)

- Key ratios have been restated where applicable.
- Information of the balances relating to discontinued operations as of September 29, 2006 are included below. The corresponding impact on shareholders' equity of the Securitas Group is included in Note 10, Changes in shareholders' equity on page 22, on the line Dividend of net assets in Direct and Systems.
